

**SoCAL****GUN**

# CALIFORNIA GLOCKS

We are nine months into the State ban on the number one selling handgun in the world. What is surprising is how the State accomplished this ban.

In typical political fashion the Glock was reclassified and set apart from all other handguns in the world. The State of California relabeled the Glock pistol calling it a "machine pistol." With this reclassification in place the state implemented restrictions for this new class of firearms. In doing this they restricted sales not only to the general population of California but an entire sector of law enforcement including all Federal Officers of law and the California State Highway Patrol.

While the sale of new Glock pistols is now prohibited you can still acquire them through private party transfer or via consignment. That being the case, SoCalGun is a great conduit for you to still get the number one gun in the world. We currently have a good selection of preowned Glock pistols available for purchase.

**Models currently available include: 17, 19, 21SF, 34 and 48.**
